HMC COMPUTER SCIENCE - CLASS SCHEDULE FOR SPRING 2012 #2 11/3/11

Joyce

On your week at a glance schedule, could you please add a statement for the 2nd page which is the page with conflict issues:

CS 65 and CS Black should be on the same day so that students can easily move between them.

Thanks

Also from Mike's email 4/27/06 – we need to put 105 against 131 and make students choose.

Note added 5/4/09: For any morning classes that will attract sophomores, e.g., cs 60 and cs 70, we must check the core offerings, e.g., physics and bio 52.

Note added 11/4/09: Make sure 140, 105, 105 lab and 81 don't conflict; students had already waited one semester to take 105 (conflicted with Graphics 155 and 81) and need it by spring of junior year to get ready for GRE's that summer and/or fall.

Note added 11/17/09: It turns out that when we moved CS 105 lab to Wednesday at 4:15, we eliminated anybody who sings in the choir: rehearsals are MW 4:15. Geoff is fine with that for this term, but we should make sure that next fall we find a lab time that lets choir people take the course.
