

CS 121 Assignment 3

(as previously indicated orally)

Due: Thursday 29 January 2009

Select two of your functional requirements for the Meeting Scheduler of assignment 1 that could be taken as use cases. (Select ones with more content, rather than trivial ones.) Give use-case descriptions for each.

If possible, mention what the goals of each are, any pre- or post-conditions, or exceptions, etc. Provide sufficient description to give a clear understanding of each use-case.
