**Notes:** If

The “if” block can be found in the ____________ tab.

The if block means, “____ this happens, ______________ do this.”

You can put blocks ______ the if block and ______ the if block.

Most of the blocks that fit ON the if block are ______________ blocks, which can be found in the sensing tab.

Different sensing blocks can detect if a __________ is pressed, if the sprite is ______________ something, or if the sprite moves to a certain ________________.

Usually, you don’t want to just run the if block __________, you want it to ______________ be running.

To make it run forever you can either put it in a ______________ or use the ______________ block.
