Intro to Operators
In Scratch, **operators** let you **connect** other ideas together.

Many of these operators do things you have seen in **math**.
Common Operators

Some operators let you **compare** values (like numbers).

Other operators let you **combine** other blocks.
Examples

Will the sprite say “Hello!” when you run this script?  
**No**

What will the variable “X” be after you run this script?  
9
