Broadcast with a Script Worksheet

You will be adding to your *Twilight* animation from yesterday by adding pauses to make the dialogue keep the same pace and speed as in the movie. Use the “broadcast” blocks to make sprites in Scratch say the lines. Use the 1 sec block to make the characters pause. (You may also add some breathing during the pauses if you want, since they breathe loudly in the movie.)

Show Mr. Bruno when you are finished and get his initials below to get credit.
