

CS121 Team Evaluation Form Fall 2012

Name: _____ Date: _____

Team Name: _____

This form is used to provide feedback on your team experience in CS121. Please evaluate yourself and your teammates, and also evaluate your game. Please **DO NOT** discuss this form or your comments with other members of the team. Your comments will remain confidential. Return the form electronically to me at mike@cs.hmc.edu or return a paper copy to my office 2nd floor Sprague by 1pm, Thursday, 19 December, 2012.

Section I:

Complete the following numerical matrix regarding your own performance and the performance of your teammates, using the scale given. Be candid and fair. Obviously the numbers you assign to yourself and your teammates are somewhat arbitrary, but the exercise should prepare you for the more narrative evaluations in Section II.

Use this Evaluation Scale: 1 2 3 4 5
 Low → Average → High

Team Member's Names	(yourself)				
Cooperativeness					
Initiative					
Quality of Technical Work					
Quality of Written Work					
Oral Communication					
Reliability and Follow-through on Commitments					
Usefulness of Results					
Creativity					
Promptness					
Preparation					

Section II:

In a paragraph or two, describe the salient contributions, strengths, and weaknesses of each team member, beginning with yourself. It may be convenient to use the same order of team members that you used in Section I. Again, be candid and fair.

Myself:

Section II (continued):

Section III:

Please comment on the effectiveness of your team effort. Are you happy with the progress the team made? How effectively did the team work together? Is there anything that might have helped the team to work more effectively as a team or as individuals? Could we as faculty provided additional support while still allowing you to truly take charge of your project? Was the game project challenging but not overwhelming task? Feel free to comment on any other aspects of your experience.

In answering the questions above and making general comments, please make suggestions for anything that should have done or not done to help the team toward a more successful conclusion to the project.

Thank you for your input.
