

Interaction Design—HW 3

September 13, 2021

1. What is "Thinking aloud" and what is its use in usability testing?

2. How can you encourage "Thinking aloud" during usability testing?

3. If you wanted images in an HTML page to disappear (the image disappears, but the space for it remains), which of the following CSS could you use (choose all that would work):

- `img { display: none; }`
- `img { visibility: hidden }`
- `img { opacity: 0 }`
- `img { width: 0 }`
